

## Techxpert Tips - Summer Edition

### Avoid overheating your computers:

- ◆ If your computer is in a cabinet, open the doors while its on.
- ◆ Never leave your laptop inside the car in the summer.
- ◆ Keep laptops out of direct sunlight if used outdoors.
- ◆ Verify your laptop is turned off or in sleep mode before putting in it's carrying case.

### Avoid overheating other electronics:

- ◆ Never leave your cell phones inside the car. Especially on the dashboard.
- ◆ Some touch-screen phones are "heat sensitive" and can burn the components if left in direct sunlight for too long.
- ◆ When outside, Place iPad's and E-Readers under a towel for shade to keep them cooler.

### Avoid costly repairs to your computer:

- ◆ Call Techxpert Solutions to send your computer to "Summer Camp".
- ◆ Complete internal dusting of all components will help to keep the computer cool.
